To Whom it May Concern:

Location Group of Companies: Mark Weipers and Roy Richardson

This is to confirm that Colliers International have had an excellent long term working relationship with the two key Directors of Location Group of Companies that spans some 18 years. In fact, prior to my experience at Colliers, I worked alongside Mark Weipers in another commercial real estate business in Auckland.

Location are regarded as a strong local commercial, industrial and retail property developer/investor. They have a reputation for "doing the business" and we have successfully completed numerous leasing and sales assignments in all 3 areas for them

Location are also very experienced in working as joint venture partners with a multitude of third party entities which would be beneficial to offshore investors in the Auckland marketplace.

I would have no hesitation in recommending Location Group as a company of integrity with in-depth knowledge of the New Zealand commercial property market. They have consistently been one of our top 10 clients.

Please don't hesitate to contact me should you require any further information.

Yours sincerely

Mark Synnott
Managing Director
